

KAIZEN HEALTH SUMMIT

Grand Hirafu, Niseko | 17-22 January 2027

CLINICAL UPDATE • SKILL BUILDING • COLLABORATIVE LEARNING

PRELIMINARY CONFERENCE PROGRAM

DAY	TOPIC	OVERVIEW
MONDAY	Anaesthesia Update: What Has Changed in the Past Two Years?	Key developments in perioperative care, airway management and anaesthetic safety.
	Frontiers of Genetics: Where Will We Be in 20 Years?	The future of genomic sequencing, gene therapy and personalised medicine.
	Speaking Up for Safety	How teams can support staff to raise concerns across professional disciplines.
TUESDAY	Giving Critical Feedback Without Creating Conflict	Practical structures for discussing performance, behaviour and clinical concerns.
	Advances in Emergency Medicine When Complaints Help - and When They Harm	The most significant recent changes influencing emergency care. Fair, constructive approaches to patient and staff complaints.
WEDNESDAY	Creating a More Environmentally Sustainable Health System	Reducing emissions, waste and unnecessary resource use in healthcare.
	Global Trends in Health	Major forces shaping healthcare and future clinical challenges.
	Genetics Beyond Diagnosis	How genomics can influence surveillance, treatment and counselling.
THURSDAY	Building Resilience in the Health Workforce	Strategies that support wellbeing, adaptability and sustainable performance.
	Genes, Environment and Function: An Occupational Therapy Perspective	How genetics and environment influence participation, development and function.
	Personalised Healthcare Without Losing the Person	Combining precision medicine with patient goals and functional assessment.
FRIDAY	What Nurses Notice First	Early recognition of deterioration and effective escalation of care.
	NDIS Through an Allied Health Lens	How planned reforms may affect patients and allied health professionals.
	The Future Health Professional	Working effectively with artificial intelligence, technology and multidisciplinary teams.
LEARNING FORMAT	Each day includes face-to-face presentations, supported by two hours of online learning. Facilitated collaborative sessions enable delegates to examine key issues, share professional perspectives and consider application within their own clinical and workplace settings.
